HL7 Connect software application

The Health Level Seven (HL7) software package is a set of international standards for the exchange, integration, sharing, and retrieval of electronic health information.

With the HL7 Connect package operators can:

- ✓ Retrieve patient and appointment information;
- ✓ Upload patient information directly from the HIS (Hospital Information System) into the prepare measurement screen of the Finapres® NOVA;
- ✓ Load the scheduled measurements of the day in the Finapres® NOVA.

After the measurements are done, the HL7 Connect software allows the Finapres® NOVA to save the measurement reports (in PDF) directly in the Electronic Patient Record in a secured way.

The HL7 Connect can be installed on all Finapres® NOVA systems with Windows 10 and up.

Key Points

- ✓ Compatible with every HIS with the possibility of sending HL7 V2 ORM messages and to receive ACK messages in combination with our interface conformance profiles (which can be requested from us);
- ✓ Able to receive patient and appointment information;
- ✓ Able to send back PDF reports.
